NPIC Project N-168-64 (DIAAP-1-3-64--partial answer)

This military installation (BE designation: Shang-jao Army Barracks and Headquarters 35th Division) is immediately north of the Yu-shan--Kuei-chi railroad and 4.3 nm NW of Shang-jao (Figure 1). Containing 6 separate areas, it could house a Chinese military division.

Area A, walled, contains approximately 40 unidentified buildings. It possibly houses a field artillery regiment.

Area B, possibly secured, contains approximately 40 unidentified buildings. The pattern of the buildings in this area is similar to that associated with Chinese tank assault gun regiments.

Areas C, D, and F each contain approxi-

mately 80 unidentified buildings in patterns similar to those associated with infantry regiments.

Area E contains approximately 125 unidentified buildings. The relationship of this area with the other areas indicates it includes a probable division headquarters and support unit.

A rail-served storage area, possibly for explosives, containing approximately 40 large storage buildings is located 2 nm WSW of the barracks area.

The small scale and poor quality of available photographic coverage of this installation preclude determination of accurate dimensions.
